

# WERMONSTER

Wermonster is an electronic musician and producer living in Berlin. After participating in numerous rock and jazz projects as a guitar and bass player, he started to create his own music in the mid-90s, experimenting with computers, loops, synths and samplers. After living in the north east of France, he moved to Marseille in 2004 and started getting involved in the local hip-hop scene: making beats and working as sound assistant in different recording studios there. Looking for fresh sounds he spent 3 months in LA in 2008, where he discovered the local wonky/beat scene (such as Flying Lotus, Samiyam, Nosaj Thing...) Always pushing his work further he has decided to move his lab to Berlin where he has already played live shows alongside artists such as Thavius Beck (Mush/Big Dada), Infinite Livez (Big Dada), the Jarring Effects Crew (L'OeufRaide, Led Piperz, Uzul...), High Tone and many more... Definitely hip hop based, Wermonster's music explores new musical dimensions, mixing breakbeats with sliced samples, acoustic, electronic melodies and cinematic atmospheres to create a soulful psychedelic soundtrack.
